ACCEPTANCE AS PATIENT & PERMISSION TO TREAT/INFORMED CONCENT

I understand and agree that the Dr. Canuel has the right to refuse to accept me as a patient at any time before treatment begins. The taking of a history and the conducting of a physical examination are not considered treatment but, are part of the process of information gathering so that the doctor can determine whether to accept me as a patient. Upon acceptance as a patient I authorize Dr. Canuel to proceed with any treatment he deems necessary. I understand that any concerns I may have regarding the risks of chiropractic care will be explained to me by request.

PATIENT RIGHTS AND RESPONSIBILITIES

As a patient of Canuel Chiropractic and Wellness Center I have both rights and responsibilities.

My Rights: I have the right to be respected and supported. I have the right to be informed about and involved in all aspects of my healthcare. I have the right to complete confidentiality regarding my medical records. I have the right to care that is considerate and respectful of my personal beliefs and values.

My Responsibilities:

1. I have the responsibility to report all of my significant health-related conditions that may be relevant to the ability of Canuel Chiropractic & Wellness Center providers to provide effective patient care.
2. I have the responsibility to accurately report to Canuel Chiropractic & Wellness Center my insurance information and any future changes.
3. I have the responsibility to attend all scheduled appointments and comply with all treatments, referrals and follow-up recommendations of my health care providers. I will call if I am unable to make an appointment.
4. I have the responsibility to behave appropriately towards all staff members. Inappropriate behavior includes, but is not limited to, 1) arriving for your appointment under the influence of alcohol or drugs and, 2) being verbally abusive to staff or others in the facility.
5. I have the responsibility to notify my healthcare providers of any changes in my condition that may necessitate a change in my treatment plan.

I have read and fully understand all of above (this page) & agree to comply with these requirements.

Informed Consent to Care

You are the decision maker for your health care. Part of our role is to provide you with information to assist you in making informed choices. This process is often referred to as "informed consent" and involves your understanding and agreement regarding the care we recommend, the benefits and risks associated with the care, alternatives, and the potential effect on your health if you choose not to receive the care.

We may conduct some diagnostic or examination procedures, if indicated. Any examinations or tests conducted will be carefully performed but may be uncomfortable.

Chiropractic care centrally involves what is known as a chiropractic adjustment. There may be additional supportive procedures or recommendations as well. When providing an adjustment, we use our hands or an instrument to reposition anatomical structures, such as vertebrae. Potential benefits of an adjustment include restoring normal joint motion, reducing swelling and inflammation in a joint, reducing pain the joint and improving neurological functioning and overall well-being.

It is important that you understand, as with all health care approaches, results are not guaranteed, and there is no promise to cure. As with all types of health care interventions, there are some risks to care, including, but not limited to: muscle spasms, aggravating and/or temporary increase in symptoms, lack of improvement of symptoms, burns, and/or scarring from electrical stimulation and from hot or cold therapies, including, but not limited to, hot packs and ice, fractures (broken bones), disc injuries, strokes, dislocations, strains, and sprains. With respect to strokes, there is a rare but, serious condition known as an arterial dissection that involves an abnormal change in the wall of an artery that may cause the development of a thrombus (clot) with the potential to lead to a stroke. This occurs in 3-4 out of every 100,000 people, whether they are receiving health care of not. Patients who experience this condition often, but not always, present to their medical doctor or chiropractor with neck pain and headache. Unfortunately, a percentage of these patients will experience a stroke. As chiropractic can involve manually and/or mechanically adjusting the cervical spine, it has been reported that chiropractic care may be a risk for developing this type of stroke. The association with stroke is exceedingly rare and is estimated to be related in one in one million to one in two million cervical adjustments.

It is also important that you understand there are treatment options available for your condition other than chiropractic procedures. Likely, you have tried many of these approaches already. These options may include, but are not limited to: self-administered care, over-the-counter pain relievers, physical measures and rest, medical care with prescription drugs, physical therapy, bracing, injections, and surgery. Lastly, you have the right to a second opinion and to secure other opinions about your circumstances and health care as you see fit.

I have read, or have had read to me, the above consent. I appreciate that is tis not possible to consider every possible complication to care. I have also had an opportunity to ask questions about its content, and by signing below, I agree with the current or future recommendation to receive chiropractic care as is deemed appropriate for my circumstance. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition(s) for which I seek chiropractic care from this office.
